## Metal-Tined Spiked Roller Covers

Midwest Rake® spiked rollers are premium quality and engineered to provide maximum performance to minimize out-gassing and promote leveling characteristics of resinous coatings as well as resurfacing materials of all types. A more dense steel tine configuration, modeled after the traditional "porcupine" roller. These rollers have a 1-1/2" aluminum core. Metal-tined spiked rollers work remarkably well with cementitious and gypsum based overlays to promote self-leveling and reduce out-gassing. All spiked rollers come with 3/8" black end-caps.
